

SEAL® Laminator Product Line

SEAL® 80 PRO

The SEAL 80 Pro is capable of running a wide variety of media and can generate high process speeds - making this machine perfect for businesses that are looking to build in extra capacity and more versatility. Capable of mounting, laminating and encapsulating prints up to 80", the machine can be used with the extensive range of SEAL laminating films, adhesives and substrates. The 80 Pro features unique design elements such as: an ergonomic touch pad control panel on a swinging arm for ease of use; an easy feed table which incorporates built-in tensioning rollers and a flip down image guide for smooth and optimum infeed of media; and outfeed slitters to trim the output to size. These innovative features maximize the performance and versatility of the 80 Pro without compromising its user-friendly nature.

SEAL® Image® 600md

The SEAL Image 600md offers a dynamic combination of quality, functionality and value. A dual heat laminator with bi-directional capability, this robust machine will mount, laminate and encapsulate materials up to 61 inches wide (1550mm) and 1 1/2 inches (38mm) thick from both sides. This laminator includes many of the acclaimed features from the successful Image 600 series plus a host of enhancements to meet the needs of today's imaging and finishing professional. Faster, wider and simpler than its predecessors, the Image 600md also includes efficiency and safety features, such as auto-grip shafts, integral braking, and electric eyes. It also has increased material handling to handle large diameter (400ft length) rolls.

SEAL® 62 Pro Series

The SEAL 62 Pro is a 61" wide mounting, laminator and encapsulator offering industrial performance at exceptional value. With fully adjustable temperature, speed and pressure settings, the 62 Pro is ideal for the more experienced finisher requiring a highly versatile laminator. It is a winner of multiple "Top Product" awards by the readers of [Wide-Format Imaging](#).

The SEAL 62 Pro Series (available in the following models: dual-heat, single-heat and cold) is capable of running a wide range of media and can generate high process speeds, which makes this range of machines ideal for businesses that are looking to build in extra capacity and more versatility. A perfect fit for owners of lower-end manual pressure laminators looking to upgrade to a professional production machine. Capable of mounting, laminating and encapsulating prints up to 61" (1550mm), this series of machines can be used with the extensive range of SEAL laminating films, adhesives and substrates. The SEAL 62 Pro Series features unique design elements, such as the combi-material shafts, which maximize versatility and minimize waste without compromising its user-friendly nature.

SEAL® Image® 62 Plus

The SEAL Image 62 Plus offers new operators an uncomplicated approach to post-print finishing. Designed to be user-friendly, the SEAL Image 62 Plus is ideal for mounting, laminating and encapsulating images up to 61 inches in width. Its versatile temperature range accommodates both low temperature, heat-activated films - such as SEAL Print Guard® for inkjet prints - and higher temperature films - such as SEAL ThermaShield® for electrostatic images. The SEAL Image 62 Plus is an excellent mid-range laminator that meets post-print finishing needs.

SEAL® 62 Ultra Plus Series

The SEAL® 62 Ultra Plus Series (available in the following models: dual-heat, single-heat and cold) is the ultimate range of easy-to-use roller laminators. Low-priced yet fully functional, they are an ideal match for your wide-format printer when high quality, professional graphics are required. Capable of mounting, laminating and encapsulating prints up to 61" (1550 mm), the SEAL Ultra Plus Series provides a cost-effective finishing solution for both inkjet and photographic media. With easy to use controls, simplified material loading and an automated take-up for removing release liners, these feature-packed laminators will process the most popular substrates up to 61" wide. The 62 Ultra Plus Series focuses on simplicity and affordability, and are great for businesses wanting to expand the applications offered to their customers or those wishing to complement existing lamination facilities.

SEAL® 62 Base – Winner of the 2010 [Wide-Format Imaging Reader's Choice Top Product Award!](#)

The SEAL 62 Base, created for the rapidly growing digital display market, is ideal for mounting and laminating pressure-sensitive graphics up to 61". This machine represents a flexible package at an affordable price - without compromising its functionality. The SEAL 62 Base is a pressure-sensitive machine with heat assist on the top roller that ensures superb results with a wide range of materials. Whatever the experience level of the operator, the SEAL 62 Base is easy-to-use, and will deliver genuine flexibility and high performance levels for the small-to-medium sized user.

Having great capability delivered at an affordable price, the 62 Base is ideal for sign makers. It provides the means for these users to finish their images and create more applications, which equals greater profitability. This laminator is also suitable for small-to-medium, display based businesses who want to expand their range of applications.

SEAL® 54 Base

The SEAL 54 Base, created for the rapidly growing digital display market, is ideal for mounting and laminating pressure-sensitive graphics up to 55.1". Ideal for sign makers, this machine represents a flexible package at an affordable price - without compromising its functionality. The SEAL 54 Base is a pressure-sensitive machine with heat assist on the top roller that ensures superb results with a wide range of materials. Whatever the experience level of the operator, the SEAL 54 Base is easy-to-use and will deliver genuine flexibility and high performance levels for the small-to-medium sized user. It allows users to finish their images and create more applications quickly and easily, which results in greater profitability. This laminator is also suitable for small-to-medium, display-based businesses who want to expand their range of applications, but have no need for an encapsulating machine.

SEAL® 44 Ultra Plus Series

The SEAL® 44 Ultra Plus Series (available in the following models: dual-heat and single-heat) is the ultimate range of easy-to-use roller laminators. Low-priced yet fully functional, the 44 Ultra Plus series is an ideal match for wide-format printers when high quality, professional graphics are required. Capable of mounting, laminating and encapsulating prints up to 44", the SEAL Ultra Plus Series provides a cost-effective finishing solution for both inkjet and photographic media. With easy-to-use controls, simplified material loading and an automated take-up for removing release liners, these feature-packed laminators will process the most popular substrates up to 44" wide. The 44 Ultra Plus Series focuses on simplicity and affordability, and is great for businesses wanting to expand the applications offered to their customers or those wishing to complement existing lamination facilities. With its sleek, attractive design, a SEAL 44 Ultra Plus rolls anywhere it is needed or stores neatly out of the way.

ProSEAL® 44

The ProSEAL® 44 pouch board laminator is the easiest to use, most cost-effective finishing system on the market today. The simple, one-step operation and dual-pressure floating nip design make it ideal for any finishing department. The ProSEAL 44 quickly and easily adds value to posters, prints and photos by making them display ready. This laminator features a low-profile, space-saving design, automatic thickness settings with pre-set roller pressure (for substrates up to 1/4" inch thick), pre-set digitally-controlled temperature, speed control, reverse mode and virtually maintenance-free silicone rollers. These user-friendly features assure consistent, high-quality results. SEAL® also offers a full product line of rigid and flexible laminating pouches and mounting boards. When teamed with the ProSEAL 44, the offering is a complete pouch board laminating and mounting solution for quick, easy and low-cost finishing applications.
